
HYSHIELD™
IMPROVES OVERALL PLANT NUTRITION
HYSHIELD
ENHANCES CONDITIONS FOR BETTER PLANT ESTABLISHMENT & GROWTH
DEVELOPED FROM RECYCLED CRUSTACEAN SHELLS
THAT WOULD OTHERWISE BE DISCARDED IN LANDFILLS

Putting Your Plant's Health First

Your plant's overall health is the most critical part of your grow. If your plant's immune system isn't strong and healthy, your crops' yields will be significantly reduced.

HYSHIELD™ tricks your plants into thinking they are being attacked by pests and as a result of this perceived infestation the plant's immune system goes into protective mode. This natural defense mechanism not only stimulates the plant's immune system but also keeps pathogens and pests at bay.

Our unique formula is derived from exoskeletons of crabs, which are a natural by-product of the crab fisheries. When applied to your crops, it can increase your plant's resilience to survive in high heat and cold stress environments. HYSHIELD™ allows plants to intake less water without lowering crop yields.

Designed to be fully compatible with water-soluble nutrient & supplement programs. HYSHIELD™ can help boost your plant's concentration and production of resin, terpenoids, flavonoids, and produces quality flowers.

Accelerate & Enhance Your Plant Growth

HYSHIELD™ is essential to protect your plants from pathogens and pests while boosting crop yields. With HYSHIELD™ in your grow from seedlings to transplanting and through to harvest, your plants are protected. This natural immune booster reduces or eliminates the need for synthetic pesticides.

This product has been created with an environmentally sustainable approach in mind by using crab shells that would have otherwise been discarded in landfills. Our innovative formula provides the necessary boost your plants require.
