

FROM THE CREATORS OF

# HYGROZYME®

**HYSHIELD™**, part of the HYGROZYME® product family, is a natural plant immunity booster made from chitosan, which is derived from the exoskeletons of crab shells. Plant cell walls have specific receptors that detect the presence of chitosan.

**HYSHIELD™** tricks the plant into thinking it's being attacked by bugs, and as a result it ups its auto-immune system, keeping pathogens and pests at bay. The proprietary formula triggers the plant's natural defense responses which increases essential oil production and maximizes yield potential. **HYSHIELD™** also boosts the overall health and strength of your plants, resulting in thicker stalks that work to support a larger canopy.

**HYSHIELD™** provides the following benefits:

1. Unlocks the true genetic potential of your plant's growth and potency.
2. Reduces transpiration, increasing the plant's resilience to a variety of environmental factors, including high heat and cold stress environments.
3. Most effective when used from seed germination or cloning, and applied as a foliar through veg, switching to root drench application in flower.

All products in the HYGROZYME® family are produced in a facility that upholds strict quality standards and absolute consistency every time, in every product.

### Application Notes:

**SEEDLING/CUTTING:** 1 mL/L (3.8 mL/Gal) as a drench or soak the grow plug.  
**VEG:** 1 mL/L (3.8 mL/Gal) for Week 1 and then increase to 5 mL/L (18.9 mL/Gal)  
USAGE: Foliar spray once a week with the lights off.  
**BLOOM:** 5 mL/L (18.9 mL/Gal)  
USAGE: Root drench once a week.

Effective in all growing media and growth stages.

Enhances flower development and growth.

Reduces transpiration without lower crop output.

Improves overall plant health and plant survival through environmental stress.

### Expert Tips:

We recommend using **HYSHIELD™** as a foliar spray during your veg cycle.

When switching to flower, continue using **HYSHIELD™** as a root drench to maintain the benefits for the whole cycle.

**HYSHIELD™** can also increase your plants essential oil production for an amazing high-quality end product.
